Howbridge Infant School

PE & Sports Premium **July 2026**

Aims and priorities for subject teaching and learning

The national curriculum for physical education aims to ensure that all pupils:

- develop competence to excel in a broad range of physical activities
- are physically active for sustained periods of time
- engage in competitive sports and activities
- lead healthy, active lives

Additionally at Howbridge Infant School our aims are:

- To ensure all children are exposed to the key principles of the Children's Health Project and what constitutes a healthy lifestyle
- To develop positive attitudes to work and working with others
- To develop a knowledge of safety factors and appreciate the principles of safe practise
- To improve observational skills and the ability to assess the effectiveness of own performance and that of others
- To provide opportunities to increase participation for every child
- To use sports premium effectively to engage children in physical activities and promote a healthy lifestyle, through increased attainment, participation and variety of opportunities both competitive and for enjoyment
- To meet the NHS guidelines for children to have at least 60 minutes of physical activity every day

Objectives of Sport Premium spend:

- **Key indicator 1:** The engagement of all pupils in regular physical activity – Chief Medical Officer guidelines recommend that primary school children undertake at least 30 minutes of physical activity a day in school
- **Key indicator 2:** The profile of PE and sport being raised across the school as a tool for whole school improvement
- **Key indicator 3:** Increased confidence, knowledge and skills of all staff in teaching PE and sport
- **Key indicator 4:** Broader experience of a range of sports and activities offered to all pupils
- **Key indicator 5:** Increased participation in competitive sport

Sources used for the scheme of work

Get Set 4 PE. This scheme of work covers all learning objectives as set out in Development Matters and the National Curriculum, and is used by all year groups as a base of their PE learning.
Children's Health Project. This project continues to supplement our PE curriculum and provide children with learning opportunities linked to having a healthy body, healthy mind and being active.

Visitors, Clubs & Competitions

- SCS (Sports Coaching Specialists) - We have 1 Sports Coach who leads lessons following the school curriculum.
- SCS Sports coach runs after school clubs for children. lunchtime clubs run daily, covering a

variety of activities. These change half termly.

- We are members of the Chelmsford Schools Partnership
- We attend competitions and festivals with local schools and through the Chelmsford Schools Partnership
- We have a dance specialist teacher, mapped out as part of our curriculum.

Strategies for teaching
(including the number of hours devoted each year to the subject)

EYFS – Children are given the opportunity to participate in physical activity throughout the school day, either as an independent task, adult led activity or as part of 1 formal PE session.

KS1 – Children have at least 2 sessions of high quality PE and physical activity each week. This takes the form of 2 x 1 hour sessions.

Our Sports coach also leads clubs at lunchtime and after school.

A variety of teaching strategies are employed according to the needs of the individual children, the class and also what is being taught. Teachers work alongside our Sport Coach, using the sessions to meet all children's needs and address any misconceptions and gaps in learning.

Planning, marking and feedback

Each year group follows the whole school curriculum map for PE.

Marking and feedback are conducted verbally during a lesson, and assessments are made throughout the scheme of work. Each class has an individual assessment folder where weekly records are kept.

Early Years use Tapestry Learning Journeys to assess against the Development Matters statements and feedback to parents. This strengthens home school partnerships and allows parents to be aware of children's progress, attainment and targets.

Please see Marking Policy for information regarding marking.

Assessment, recording and reporting

Assessments are made by the Class Teacher and Sports Coach at the end of a unit of work and are recorded and reported to parents following school and National guidelines.

Inclusion - equal opportunities, racial awareness, gender, SEN

All children have equal access to activities. Children with SEN will be given full access to the PE curriculum with adaptations being made as appropriate and as advised. Special abilities are noted on individual pupil profiles.

Training is reviewed and new opportunities for staff given every few years, or when a need arises.

Resource use, monitoring and acquisition

A wide range of equipment is accessible for all areas of activity within the hall. The condition of resources is reviewed annually. Health and safety checks on large apparatus are made annually.

The PE & Sports Premium action plan shows how the subject area will be developed and how children will benefit and make increased progress from the additional Government funding. This

plan includes training, resources, coaches and expenses for events. The impact of the funding is documented on our school website.

Links with other subjects

Studies have shown that PE has a positive impact on children's learning and emotional well-being. PE has strong links with PSHE, Science and Outdoor Learning. Speaking and listening skills also form an important part of a PE lesson, for example listening to instructions and talking about each other's performances. Maths and ICT skills can also play an important role in lessons.

PE also plays an important role in the Healthy Schools Initiative.

Outdoor Learning

Outdoor learning priorities linked closely with PE lessons and all subjects through cross curricular planning include:

- To raise the profile of outdoor learning across the school
- To provide opportunities for all children to access well planned outdoor learning to meet their needs and interests through a range of resources and experiences
- To provide equipment that develops physical skills and also skills across the curriculum
- To make good use of outdoor space so that children are enabled to learn by working on a larger, more active scale than is possible indoors
- To provide a safe and secure environment that they can take risks in
- To encourage children to take care of their environment
- To provide opportunities to work independently and collaboratively with enthusiasm and perseverance
- To support learning in the outdoors by sharing their experiences and interests
- To provide appropriate adult intervention to help children make progress in their learning and to develop and enhance children's opportunities to learn through play
- To provide the opportunity for children to develop their gross motor skills and their general health and fitness in the outdoor environment.

Reception - The planning of the EYFS curriculum ensures that children are given the opportunity to participate in outdoor learning throughout the school day, either as an independent or adult led task. Reception children have access to independent outdoor learning with a free flow system in place, allowing them to make their own choices and increase their learning opportunities.
KS1 children have the opportunity to experience planned outdoor learning lessons across all subjects throughout the year.
Every KS1 class has at least one outdoor learning maths lesson that is evidenced in the class floor book.
Classes are timetabled to work regularly in our new outdoor learning classroom.

Monitoring and evaluation of teaching and learning

Procedures for monitoring teaching and learning are set out in subject management, assessment and other supporting policies.

Staff and school development

Staff and school development needs are identified through School Evaluation and Development Planning and Performance Management procedures, and the Sports Premium Action Plan.

The focus for staff development links to the school improvement and subject development plans and takes into account individual needs identified through performance management. Training is arranged for Teachers and Teaching Assistants to ensure that high quality PE is delivered. Recent training is detailed in the Sport Premium update.
